

Love *your* heart

February is American Heart Month. Far too many family members, friends and loved ones aren't aware that heart disease is the number one killer of women in America. This month, join Bakersfield Memorial Hospital, the American Heart Association and the national Go Red for Women program in supporting ongoing research and education about women and heart disease.

Memorial Hospital is proud to join the thousands of women, companies and organizations across the country ready to spread the word and make a difference. Heart disease *can* be prevented. So love your heart. And together, we can save it.

To learn more about the Go Red for Women program, visit www.goredforwomen.org.
